ALTA

Mrs. Crockett of Youngstown was a town visitor on Tuesday.

A. A. Stephenson of Granum, who for some years lived in this district and still owns his farm here, was a Chinook visitor over the week end, was the guest of Mr. and Mrs. W. W. Isbister,

Mrs. Thos. Gilbertson entertained a few ladies to afternoon tea on Thursday in honor of Mrs. Deman.

Mrs. R. D. Lawson of Drumheller is visiting at the home of her sister, Mrs. P. Peterson, for a week.

## LOCAL ITEMS

Gabrielle Massey was the winner of the doll house which was donated to the Catholic church by Miss Celia Peyton.

The members of the Card Club gave a farewell party to Mrs. I. W. Deman, who intends leaving Chinook shortly to reside in Calgary. The party was held at the home of Mrs. J. Massey on Thursday, June 28th.

The compulsory pool idea was decisively defeated by delegates at the semi annual meeting of the Saskatchewan Wheat Pool at a meeting held in Regina last week. At the same meeting a motion was passed requesting all Progressive members of the Saskatchewan Legislature to refuse cabinet positions and withhold their support from the Gardiner government.

At a meeting of directors of the Agricultural Society on Friday evening last many details for the fair to be held on July 30th were dealt with. It is proposed to have a baseball diamond on the new grounds so that in future the visitors will not have to leave the fair grounds if a ball game is going on. The next meeting is to take place on Tuesday, July 16th when ladies and all interested in this year's fair are requested to attend.

The Ladies' Card Club met last week at the home of Mrs. Jacques. Mrs. Rennie held the high score, winning a very dainty boudoir pillow. The annual election of officers took place, viz.: President, Mrs. Hurley; Sec. Treas., Mrs. Vanhook. The club will discontinue for months of July and August.

Mrs. and Mrs. C. W. Rideout visited at the home of Mr. W. K. Crockett, Youngstown, Monday evening.

THIS WEEK  
Friday & Sat'day  
June 28-29

## CEREAL SPORTS

Oyen Again Takes First Money for  
Baseball With Naco Second.

The citizens of Cereal have reason to be proud for the large attendance at their sports and baseball tournament yesterday, June 26th, especially considering the short time they had been advertised.

Hollywood and Naco were drawn to play the first game. In spite of the heavy hitting some good ball was played, as the field work of both teams was fair. Hollywood had the best of the play for the first five periods, but by the time the seventh innings was finished Naco had tied the score seven all. Another two innings was played, during which Naco scored another, ending the game 8-7 in their favor.

For the second game the two old rivals, Chinook and Oyen, met. This was one of the best games played this season, and possibly no seven innings occupied less time. Oyen was first to bat, but with Nicholls in the box they were blanked—in fact it was not until the first half of the fifth that any runs were made when Oyen tallied two. The sixth innings was scoreless, but in the seventh and final Oyen again registered two, winning by 4-0. While Chinook was held to no score for the game it was certainly no discredit to them, as Oyen certainly have a good aggregation and their team work on the whole good. Nicholls for Chinook was in good pitching form, and was ably supported by Steckle's catching. L. Stull done fairly well for Oyen, though his control of the ball yesterday was not as good as we have seen.

The final game between Naco and Oyen was not finished owing to the threatening weather, but Oyen being in the lead was given the game.

Good headway is being made by the contractors with the new hotel at Cereal. It will be frame construction with full cement basement, steam heated, electric lights and as modern in every other respect as it is possible. The Empire Lumber Company have the contract.

Myles Kerr of Naco visited at the home of W. W. Isbister on Saturday.

Miss Mae Peterson, Clarence and Mrs. Peterson returned from their vacation on Tuesday.

We are glad to report that Geo. Aitken who has been very ill with erysipelas is rapidly improving.

Chinook baseball team journeyed to Oyen during the week end, but did not add any laurels to their string. It was a fair game from the spectators point of view, though the weather was not favorable to good ball. Chinook scored one in each of the first three innings to Oyen's one, while at the end of the fourth the score was three all. Nicholls who had been pitching a good game for Chinook was retired for Barbey for Chinook in the seventh inning, but Barbey was unable to into his old time form, and Oyen finished the period with a score of 7-3 in their favor. While Horne for Oyen still had good control of the ball, Chinook batters in the seventh managed to hit him hard, and with a three base hit by Scott brought the locals three runs. In the final round both teams added one to the score which ended 8-7 in favor of Oyen.

In this district we have had a number of light showers during the week which will help the grain and gardens considerably. There was a very heavy rain stretching a distance of seven miles wide north of Chinook, but was not so heavy south of town.

All persons driving motor cars and trucks should see to it that they get their drivers license before July 1st, after which date all persons over 16 years of age are to be in possession of same.

Don't forget Mrs. Deman's auction sale of household furniture to be held on Saturday, June 29.

June 21st was the longest day,

## Noxious Weeds

Are unsightly in fields and gardens and along roadsides.

Rob the soil of valuable plant food.

Occupy space which should occupy grain.

Reduce the grade of the threshed crop.

Cost money to thresh, haul and ship to market.

The first week in July has been designated as

## WEED WEEK

and a special campaign urging the eradication and control of noxious weeds will be conducted.

Watch for articles in the press and for announcements of meetings and radio addresses.

Published by a committee representing the—

ALBERTA SEED GROWERS' ASSOCIATION,  
ALBERTA ADVISORY WEED BOARD,  
ALBERTA DEPARTMENT OF AGRICULTURE.

The Chinook school will close for the summer vacation on Friday, June 28. The public school promotion results will be published in next week's issue. The grade VIII and high school results will be published early in August. This year there were 13 students writing on grade VIII, and 29 students writing the examinations in grades IX, X and XI.

In this district we have had a number of light showers during the week which will help the grain and gardens considerably.

There was a very heavy rain stretching a distance of seven miles wide north of Chinook, but was not so heavy south of town.

Large steel pipes laid in concrete

from the mouth of the coulees are in place for some distance for pumping water from the creek. A trenching machine is being used to expedite the work on the pipe line from the reservoir to the C.N.R. track near Dobson.

It is expected that at least another two months will lapse before the work is completed, and will cost over half million dollars, but will assure the C.N.R. of a water supply second to none along the Goose Lake line.

More than 5,000 schools of England have been equipped with radio sets and are receiving broadcast lessons.

## Apply the Same Principle

During recent years there has been a decidedly better understanding between the east and the west of Canada, and between the Maritime Provinces and the rest of the Dominion, based on closer acquaintances and knowledge of the problems confronting the people in each of the major sections of this far-flung country. There is today far less of sectionalism, prejudice and misunderstanding than in any previous period of Canada's history, and, happily, this spirit of goodwill and co-operation is growing more and more pronounced.

Anything and everything that will tend to promote this wider knowledge and better understanding should be done and encouraged. We believe goodwill and understanding can only be brought about and maintained by frankness and the dissemination of knowledge. That is eastern people must be made and kept acquainted with actual facts about the west and informed as to the views, opinions and ambitions of the west, and, vice versa, western people must be informed in like manner about the east. And it is particularly the duty of the newspapers of the Dominion to discharge this patriotic duty.

It is in the performance of that duty we would draw attention to a recent editorial article appearing in "The Financial Times," Montreal, dealing with the subject of the revision of the Grain Act. To much of that article no exception can be taken, but the whole difficulty is that it is based upon an entirely wrong conception, which fact is made abundantly evident in the concluding sentence of the article, as follows: "The important consideration is to protect the buyer, which will at the same time be a safeguard on the dependable reputation of Canadian wheat in all markets."

This may be the eastern viewpoint, but we submit the western viewpoint, and that is that the word "producer" should be substituted for the "buyer" in the sentence quoted.

The person entitled to receive first consideration in matters affecting the grading, mixing, transportation of wheat is the man who grows the wheat, not the man who buys it, or transports it, or mills it into flour. The status of Canadian wheat in the markets of the world must remain unimpaired at a high standard, not so much for the benefit of and protection of the British or foreign buyer, but in the interests of and to protect the Canadian farmer who grows the wheat in order that he may obtain full value for his product and ample reward for his labor.

Submitting the western viewpoint for the benefit of eastern people, it may well be asked of "The Financial Times," and other exponents of its dictum that in matters affecting the grain trade of Canada the important consideration "is to protect the buyer," whether it and, they are equally prepared to accept the principle that, in all matters affecting, say the customs tariff, the important consideration is to protect, not the manufacturer of the financier who has invested in manufacturing industry, but the great mass of consumers of Canada, the people who "buy" the products of those factories?

If it is the "buyer" of the products of the farm who are deserving of first consideration, and who above all should be protected, then pure logic must force acceptance of the principle that it is the "buyer" of the products of the factories who must likewise be given first consideration, and their interests recognized and protected first and foremost in all matters of tariff or other legislation affecting such industries.

In other words, according to the eastern view, as they would apply it to the tariff, it is not the industry that should be protected, or those who have made investments in industry and labor in it, but the buyers of the products created by such industry. The truth is, however, that when these same interests advanced tariff and other arguments in their own behalf, they directly reinforced the principle, and reasonably contend that it is the producers—manufacturers who must receive first consideration and be accorded protection, rather than the buyers, i.e., the consuming masses of the Dominion.

Good understanding and complete national co-operation between east and west cannot be built up in this way. It is impossible to apply one principle toward western agricultural industry and an opposing principle to eastern manufacturing industry. The same principle must be applied both east and west.

## Discover Radium Mines

Find in England Has Already Yielded \$3,000 Worth

Radium mines are not discovered every day, but some meteorologists, while exploring a lead near Matlock, England, had their candle lights extinguished by bad atmospheric conditions. They saw ahead of them a dimly lighted cave, and a sample of earth taken from the cave was sent to Mme. Curie, who declared it to contain radium. The mine and estate was then bought for \$450,000. Further exploration, it is stated, has resulted in the discovery of another radio active mine, which is now to be exploited. The estimated value of the radium already found is \$5,000.

Half of the world's supply of aluminum comes from Arkansas. Aluminum is never found in its metallic state, but is always combined with bauxite, granite, felspar, mica, etc.

## Declares Allies Fear Of Germany Absurd

Only Nation Without Arms Says Minister of Defence

Dr. Wilhelm Groener, minister of defence, in a speech reviewing Germany's military policy charged that the states victorious in the world war have done nothing along armament lines and endeavored to show that it was absurd for the allies to claim they could not disarm until they were sure of not being attacked by Germany.

Speaking of present military forces, he said:

"France has, on European soil, 27 divisions; Belgium six; Poland 30, and Czechoslovakia 26 brigades, a total of 76 divisions compared with Germany's seven. Who, I ask, needs security? I can't leave unmentioned that besides these troops, the other nations also possess aviation squadrons, heavy artillery and powerful reserves of trained men and war material of a kind we do not possess at all."

## Double Jeopardy

A correspondent assures us that the following notice has been posted around about an electric station in Donegal: "Beware—To touch these wires is instant death. Any one found doing so will be prosecuted."

With a population that ranks 28th among the countries of the world, Canada is fifth in total exports and third in total turnover of trade.

Keep Minard's in the Medicine chest.

## Settlement Scheme Nears End

Three Thousand Family Settlement Plan Has Been a Success

In a few weeks the 3,000 family settlement scheme will end and no project of like nature will take its place, Hon. Robert Forke, Minister of Immigration, stated recently. There was no desire to make the project an endless one by replacing settlers who had abandoned farms, he said.

The project had been successful in every respect, and Canada had acquired an increase of about 17,000 souls through it. Already 3,250 families had been brought to Canada under the scheme: a total of 520 families had abandoned their farms for various reasons; 341 had been deported; 72 had returned to Great Britain of their own accord, while 414 remained in Canada in other employment, either in agriculture or other work.

## WHAT OUR GIRLS NEED

When Languid, Anaemic and Feeling Run Down

When a girl grows languid, dull and listless with her health failing and she becomes pale, you may be sure that the cause is anaemia, or impoverished blood. The bright, red color of the blood is caused by the presence in it of millions of tiny red corpuscles. It is these red corpuscles that carry nourishment from the blood to the tissues. They also cause the glow of health in cheeks and lips. When a girl's blood is deficient in these red corpuscles, her blood is starved and purify the blood, and there is serious danger of a decline. What is needed is an improvement in the quality of the blood, and it is a scientific fact that a course of Dr. Williams' Pink Pills will do this. They will cleanse and strengthen the blood, and purify the blood, and all traces of anaemia and its accompanying weaknesses will disappear. As an evidence of the value of Dr. Williams' Pink Pills in cases of anaemia, Mrs. John F. Hobbs of St. Louis, Mo., P.E.I., says: "I am glad to take this opportunity of recommending Dr. Williams' Pink Pills. My daughter was in a bad way, her complexion very pale, nervous and much weaker. I had tried several medicines, but they did not seem to do her any good, so I decided to give her Dr. Williams' Pink Pills. Almost from the start she began to improve, and after the few boxes had been taken in weight, her appetite improved and she had a better color in her cheeks—in fact she had fully regained her former good health. I would advise every mother to give young girls to give them Dr. Williams' Pink Pills as the first sign of an anemic condition."

You can get these pills from any medicine dealer or by mail at 50¢ a box from The Dr. Williams' Pink Pill Co., Brooklyn, Ont.

## Zeppelin's Flight Cancelled

Atlantic Trip of German Dirigible Postponed Until 1930

A special despatch to the Telegraph Union from Friedrichshafen said that the trans-Atlantic flight to America of the dirigible Graf Zeppelin had been postponed until 1930. A flight around the world for the big airship was scheduled to start about July 15.

The Graf Zeppelin's last attempt to fly to America ended on May 17, when crippled motors forced her to turn back over Spain.

Capital invested in the world's rayon industry now exceeds \$500,000,000.

## From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bony baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did." —Mrs. Milton McMullen, Vanessa, Ontario.

Lydia E. Pinkham's  
Vegetable Compound

Lydia E. Pinkham Mfg. Co., Lynn, Mass. U. S. A.  
and Cobourg, Ontario, Canada.

## Settled Trout For Jasper Park

Anglers May Expect Real Canada's Largest Mountain

Playground

So successful was the experiment made by the Dominion Government last year in stocking Maligne Lake, in Jasper National Park, with trout, that a quarter of a million more fry are now growing up in the hatchery there, and will be turned loose in the great glacial lake in a few weeks time.

As eggs, the 250,000 travelled to Jasper from Cresco, Pennsylvania, last winter, and so carefully was the precious freight handled by the Canadian National Express that only 70 of the eggs failed to hatch. Arrived at Jasper, the eggs were given into the care of Warden Herbert Davis, who is carefully nursing them along. He feeds the multitude four pounds of chopped liver a day and keeps the water moving and at a proper temperature.

Early in June the fingerlings will be taken out of their trays and transported in tins to Maligne. "The fish put in there last year," says R. Langford, supervising warden, "have done marvelously well and have grown to a good size. They are the new batch are speckled trout. We expect a shipment of rainbow trout in a few weeks for Cabin Lake."

For sunburn—apply Minard's Liniment.

## Canadian Jersey Breeders

Good Market In States For Canadian Bred Jersey Cattle

Writing from Tupelo, Mississippi, W. Elmo Ashton, fieldman for the Canadian Jersey Breeders' Association, points out that it is apparent to anyone going through the States of Georgia, North and South Carolina, Mississippi and Alabama that the southern states offer a great market for Canadian Jerseys. In the past year and a half these states have taken from Canada over 300 head of young bulls and heifers.

There are other fire-detecting devices also—devices that betray a fire at the slightest change in temperature. The device is very pale, nervous and much faded. It is after they have performed at their part that modern fire extinguishers are brought into play. These are pipes which by the simple turning of a valve, without opening the hatch or the hold in which the fire has started, can fill that hold with live steam, in which no fire can live. Or one can flood the hold through the same pipes with carbon dioxide, and again the fire is out, with negligible damage to most classes of cargo. Or the hold can be flooded with a substance that flows over the flames like a blanket or this foam and smothers them.

Small Churches In England

What is said to be the smallest ecclesiastical building in Britain is St. Margaret's Chapel, Edinburgh. This little church is only 10½ by 10½ feet. Dorset church at Winterborne Thompson, is 23 by 14 feet. Churches at Culbone and St. Lawrence are also small, having less than 40 square feet of space.

Minard's Liniment

Minard's is the stand-by of those who take care not to suffer from stiffness and aching muscles.

Emerald Lake, Yoho Park

Beautiful Emerald lake, in Yoho national park, British Columbia, was first visited by Tom Wilson in 1882 while searching for stray pack horses. As far as is known, he was the first white man to visit this lake.

## Revising Quota Laws

U.S. Will Admit Double Number Of British Immigrants

Nearly twice as many Britons yearly may enter the U.S. by the immigration quota after July 1. The Senate refused to prevent the national origin clause of the immigration act of 1924 from going into effect on that date.

It follows from the action of the Senate that the quotas of the various nations which send immigrants to the U.S. will be revised. The greatest changes will be in the quotas as affecting Great Britain and Northern Ireland, Germany and the Scandinavian countries.

British immigrants to the number of 65,721 will be permitted to enter the country as against the old number of 34,007.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

Bad Eelish Way

Scot (to friend while visiting London): "Now, man, I can't stand taxicabs! When I sit in 'em back tae the driver, it makes me feel sick, and when I sit in 'em face tae the taxi-meter, it makes me feel nae better."

Professor—Go your fastest my man! I am in a desperate rush.

Taxi Driver (after speeding along for 30 minutes)—Say, you forgot to tell me where we are going.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

Refine Gold At Mint

Most of Canada's gold bullion is now refined in the Royal Mint at Ottawa.

Minard's Liniment for sick animals.

Covered with Para-Sani Heavy Wax

Paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged canton at grocer, druggist or stationer. For less exacting uses get "Centre Pull" Packsin sheet form.

## Speckled Trout For Jasper Park

Anglers May Expect Real

Canada's Largest Mountain

Playground

Your doctor will tell you how the act of chewing relaxes and soothes strained nerves, and how the healthful cleansing action of Wrigley's refreshes and tones you up all round. Aids digestion.

## Sheet Glass Factory

Calgary May Be Selected As Suitable Place For Establishing Plant

Calgary is very suitable for the establishment of a sheet glass factory, and it may be chosen as the site for such within a year, according to F. S. Hobbs, of Toronto, vice-president of the Consolidated Plate Glass Company, who has been inspecting various cities in Western Canada with a view to locating a branch plant. A big business is being done in plate glass in the Prairies Provinces, he said, making it advisable for the firm to enlarge its present holdings.

For Cataract—It is one of the chief recommendations of Dr. Thomas Electric Oil that it can be used internally with its greatest success. Sufferers from cataract will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonial.

## Believe It Or Not

A small tortoise, on which Mrs. Sarah Blair, now dead, earned her initials and the year "1862," 67 years ago, has been found by her daughter, Miss Mary Blair, within a mile of the original Blair home at Scotsburg, Ind.

Glimoy, considered one of the most weather-beaten places in northern Norway, has a new church. To prevent its being blown away it is anchored to the rocks by heavy chains.

## In The Locker Room

Minard's is the stand-by of those who take care not to suffer from stiffness and aching muscles.

## Dominion's Capital An Attractive City

Champlain Was First White Man To See Place Where Ottawa Is Built

Three hundred years and more have rolled away since the first white man saw the site of the future capital of the Dominion. He was that intrepid and indomitable soul whose name is writ large upon the history of our country—Samuel de Champlain.

It was in the far-gone year of 1615 that the founder of Quebec, and the great architect of the Empire of New France, paddled up the unknown reaches of the Ottawa River from Montreal, and was halted by great falls of the Chaudiere below the cliffs, on which now stand the Canadian Houses of Parliament. He was the first white man to view the glorious panoramas of hills, rivers and valleys by which the City of Ottawa is surrounded. There is ample evidence that Champlain stood upon the spot where Ottawa afterward was located, and where centuries later were erected the legislative halls of a new and great nation.

Champlain and his companions in the great westward voyage of discovery passed up the river, portaged at the Chaudiere, and went on their way to Georgian Bay, through the country of the Hurons, Algonquins and Ottawas. They encountered in the Chaudiere the evidences of that great Indian conflict between the northern tribes and the Iroquois of the south that ended eventually in the destruction of the Five Nations, but not before the northern tribes had paid the penalty. Here, at the Chaudiere, the Indian warriors of the North, coming down the Ottawa, encountered the Iroquois who awaited them at the famous battleground. Hence, in the environs of the future Capital of Canada, the original inhabitants fought their great decisive battles for supremacy and control of the upper half of the continent.

The history of Ottawa since Confederation is practically the political history of Canada. Here all the great legislative measures of the past sixty years have been formulated, and here all the effects of the tidal waves of public opinion have been felt. But Ottawa is more than a political centre.

Scenically the Capital is one of the most beautiful cities on the continent. Its location on the high hills overlooking the majestic Ottawa is unrivaled. Standing on the bluffs, comprising Parliament Hill and Nepean Point, where Champlain first set foot, the visitor is confronted with a picture of river, lake and mountain unique in urban environment in North America.

In the summer months the Gatineau Valley attracts visitors from all parts of the continent to take part in its splendid fishing and hunting facilities. Ottawans say that the scenery of the Gatineau surpasses that of Switzerland, and the valley is a paradise for those seeking recreation and amusement.

Industrially and commercially the Capital has made vast strides during the past twenty-five years. Today the city numbers within a radius of three miles of the City Hall a population of almost 200,000. Its splendid streets, its magnificent driveway, its numerous and beautiful park system, and its many splendid and imposing commercial buildings and residences, mark it as one of the outstanding evidences of the prosperity and growth of the Dominion.

**Largest Grindstone In World**  
What is believed to be the largest grindstone in the world was recently exhibited in London. It is 6 feet in diameter, 14 inches thick, and is built in 24 sections. The sections are grindstones in themselves, shaped in the form of a keystone arch and joined to the hub to form the surface of the wheel.

The tax assessor thinks he has an excuse for being a pessimist.

"You will recognize the road again for our return?"

"Yes. I have left my marks!" — *Polo Melo, Paris.*

W. N. U. 1791

## Egg Laying Contest

Steady Increase In Average Eggs Produced Is Shown.

The Egg Laying Contests conducted by the experimental farms of the Department of Agriculture, at Ottawa, have been operating for nine seasons. Contests have been conducted year by year for all Canada, and for the provinces of Ontario at Ottawa, and one or two points in each of the other provinces. In the report of the work for the sixth, seventh and eighth annual contests, published in Bulletin No. 108, of the Department of Agriculture, it is shown that up to the year of 1927, 26,820 hens had been tested in trap nests. The testing began in 1919-20 with 1,010 birds, which gradually increased to the highest point of 4,220 in 1925-26, which was ten birds higher than the year following. During these years there was a steady increase in the average egg production up to 1925-26, when it reached 175.5. This was an improvement of 57 eggs over the average of the first year of the contest. In these contests, which have the twofold purpose of stimulating interest in the breeding of birds for egg production and the providing of a medium for qualification for registration, the birds are kept constantly housed in flocks of ten, and include the following breeds: Barred, White and Part-ridge Plymouth Rocks; White and Silver Laced Wyandottes; Single Comb and Rose Comb Rhode Island Reds; White, Brown, and Buff Leghorns; Single and Rose Comb Arborcrosses; Buff Orpingtons; Chanticleer, and Jersey Black Giants. The report, which is available at the Publications Branch of the Department, is a most interesting document on the work of poultry improvement.

## Englishman Invented Thimble

**Idea Became Instantly Popular and Inventor Made Fortune**

The thimble, a seemingly insignificant little article, is nevertheless an important requisite for the woman who does her own sewing. Yet, very few people know where it was invented, who was the inventor, and why this useful little article is called a thimble, according to a writer in Popular Knowledge.

The thimble, a sewing accessory that appears to be too simple for any comment, nevertheless, resulted in the acquisition of a great fortune by its invention.

Less than two hundred years ago the thimble was unknown to the civilized world. The idea of protecting the fingers from needle pricks as well as simplifying sewing suggested itself to John Lofting, an humble metal worker in England. He constructed a metal top that fitted snugly on the thumb. Because of its resemblance of a bell and its being worn on the thumb, the invention was called a thumb-bell. The article was immediately acclaimed all over England for its usefulness in sewing and the demand for it was widespread. Lofting was obliged to manufacture the article on a large scale and before long found himself a wealthy man. After a while the innovation was constructed to be worn on the middle finger, and the name of thumb-bell was changed to thimble or thimble.

## An Apt Reply

**Clever Wit Shown By Speaker During British Elections**

The best reply in the British elections of a candidate to a heckler must surely be that of Mr. Somerset Stopford Brooke, the Liberal candidate for the Guildford division. Mr. Stopford Brooke is in his early twenties. He was president of the Oxford Union a few years ago and is a relative of the famous divine. A Tory lady at his meeting at the village of Eisted, put the question, "Don't you think you are too young to go into Parliament?" Mr. Stopford Brooke replied: "Well, madam, I would rather go into Parliament in my first childhood than in my second." That ought to become a classic in this age of youth. Another of his scores with hecklers was when a drunken man interrupted a meeting and demanded that this was not a public meeting. The candidate said, "This is a public meeting, my friend—not a public house." — *From "The Passing World," in Manitoba Free Press.*

**Largest Grindstone In World**  
What is believed to be the largest grindstone in the world was recently exhibited in London. It is 6 feet in diameter, 14 inches thick, and is built in 24 sections. The sections are grindstones in themselves, shaped in the form of a keystone arch and joined to the hub to form the surface of the wheel.

"I'll bet if I was married I'd be boss and tell my wife where to head in," declared the bachelor.

"Yes," retorted the old married man, "and I suppose when you get to a railroad crossing you honk your horn to warn the oncoming express to get out of your way, don't you?"

Perhaps the man who sings while he shaves merely has a better razor than the one who grows.

Maybe He Would

"I'll bet if I was married I'd be boss and tell my wife where to head in," declared the bachelor.

"Yes," retorted the old married man, "and I suppose when you get to a railroad crossing you honk your horn to warn the oncoming express to get out of your way, don't you?"

Perhaps the man who sings while he shaves merely has a better razor than the one who grows.

## The Feeding Of Dairy Cattle

**More Profitable For Average Farmer To Feed Mangel Rather Than Sugar Beets**

Experiments would indicate that it is little to choose between mangels and sugar beets for the feeding of dairy cattle. A test made at the Agassiz, British Columbia, experimental farm last year, indicates that slightly better yields of milk were obtained from the use of sugar beets, which, however, were offset by the greater difficulty of growing the beets. The experiment was conducted during February and March. Each cow under test was fed, in addition to a ration of mixed grains, alfalfa hay and ensilage, thirty pounds of roots. The experimental procedure was on the three periods plan. During the first and third periods out of the two roots was used in the ration, during the second or intermediate period the other root was fed. The results of the test are given in the report of the superintendent of the station for last year, published by the Department of Agriculture, at Ottawa. Ten cows were used in the trial. In the table of results it is shown that to produce 100 pounds of milk was required in addition to the other feeds, 115.03 pounds of mangels as compared with 111.6 pounds of sugar beets. The cost of the entire ration to produce 100 pounds of milk was \$1.05, when the mangels were fed, and \$1.91 from the sugarbeets. In the production of a pound of butter fat, there was almost a cent difference in favour of the sugar beet ration. During the week the ten cows were getting mangels, according to this report, they gave 55.6 pounds of milk less than the week they were fed on the sugar beets. Since sugar beets yield slightly less roots and are more difficult to harvest, Mr. Hicks, the superintendent of the station, regards it as a wise practice to adhere to the growing of mangels rather than sugar beets for the feeding of milking cows.

## Age and Usefulness

**Many World Leaders Are Remarkably Young in Intellect**

Too old at forty is discredited in many places. Many men, old in years but young in vigor and intellect are the world's leaders. For instance, at the world court, one notes Lord Phillimore, aged eighty-three, associated with Elihu Root, eighty-three, and John Russell Moore, who has just died. The fact is that a man is just as old as when he was a lad regardless of his years. Burning the candle at both ends at twenty is not likely to result in mental vigor at seventy.

Laugh and the world laughs with you; growl and the world laughs at you.

## Shrubbery Bloom On The Prairies

**Flowering Shrubs Provide a Succession Of Blooms Throughout the Summer Season**

Flowering shrubs of various kinds, cultivated in the Prairie Provinces, provide a succession of bloom throughout a long season. The procession commences with the Daphne in April, followed by the graceful catkins of alders, birches and hazels, and the pussy willows. In early May floods of bloom commence with Siberian April, Siberian April, Sandstone, Mountain Flowering Pine, Native Plum, and Japanese Cherry. The crab and spirea frequently exhibit billows of white and pinkish bloom by Empire Day, when the Sand Cherry and Red Elders are also usually in flower. The Persian Lilac follows in June along with the Tartarian Honey-suckle, Hawthorn, Spiraea, Flowering Currant, Mountain Ash, Dogwoods, and other shrubs. By mid-June beauty is provided by Menzies Spiraea, Round-leaved Spiraea, Arrowwood, Josquin Snowball, Mountain Ash, Mountain Maples, and Bittersweet. The High-bush Cranberry and European Ash are luxuriant followed by the various Shrubby Potentilla which are described by Mr. W. R. Leslie, superintendent of the Morden experimental station, in his report for last year, as persistent providers of bloom over a long range of time. It has been demonstrated too at the Morden station that with the coming of July, the Japanese blue and Amorphia Fruticosa become effective, followed quickly by Black Elder, Golden Elder and Spiraea Sorbifolia, followed again by Cut-leaf Elder, Maxima, Anthony Waterer, and Leadplant. The report of the station, published by the Department of Agriculture, at Ottawa, gives very interesting information on such other ornamentals as roses, peonies and iris, and other flowers that may be used with fine effect in the public parks and on private grounds in the Prairie Provinces.

## Some Old Timepieces

**Many Beautiful Ones Are In Guildhall Museum, London, England**

Guildhall Museum, in London, England, has some of the most beautiful and old timepieces in existence. One sets a see-saw rocking every hour; another denotes time by musical time. A "clock-watch," of 1580, has pins set at each hour so that time can be ascertained by feeling. There is one large clock of the Empire period on whose face miniature negroes strike the hour on bells. A giant watch is six inches across the face. This, however, was worn on a giraffe and not intended for a pocket.

He: "Did you have a good time at your party?"

She: "Wonderful—two girls and sixteen boys came."

## Sailed Over Familiar Ground

**Historian Says Columbus Made First Trip As Obscure Sailor**

Christopher Columbus visited America as an obscure sailor aboard a Danish vessel several years before his historic voyage of discovery in 1492, according to claims of the historian, Louis Ulloa, in a forthcoming work, which is based on new and original research.

According to the story as reconstructed by Ulloa, the three historic Columbus caravels did not sail into an uncharted sea but followed a trail blazed by daring seafarers since the days of Lief, the Lucky. Ulloa's claims may be summarized as follows:

Columbus was only one of many who visited and revisited the Americas. On his first cruise the vessel touched at Haiti. He thought he heard the black natives term the land "Cipangu" and concluded he had reached the land of Cipangu and Cathay recorded in the chronicles of Marco Polo. He returned to the Canary Islands and made his way to the nearest court to interest some monarch in another voyage.

Ferdinand, of Castile, and Isabella, of Aragon, did not lend a ready ear to the tale of the seaman, but the queen allowed herself to be swayed by the word of her confessor, a priest, in whom Columbus confided under the seal of the confessional. The agreement subsequently drawn indicated that the sovereigns were aware Columbus was not making the trip for the first time.

Facts alleged by Ulloa and other historians pale somewhat the achievement of Columbus as a discoverer.

Columbus' cruise, surrounded now by a wealth of legend, came at a time when political and economic conditions had severed the splendid contacts that existed with America. But Columbus knew of the old world through the Portuguese, Italians and Scandinavians, and, knowing this, went to Denmark to seek passage on one of the ships setting sail on the new land, according to Ulloa's claims.

## Japanese Using Motor Cars

**Placedrikishas Is Being Replaced By Modern Mode of Travel**

The rikishas is going the way of the horse-drawn buggy and soon the picturesque form of conveyance will be as rare in the cities of Japan as the ancient clichee in the streets of Montreal.

The manufacture and export of rikishas, once a thriving industry in Japan, is rapidly falling off, due to the decrease in domestic demand and the fishing competition of manufacturers of other countries.

The real cause of the extinction of the rikishas, as in the case of the horse-drawn vehicles, is the motor car. It is fast disappearing from the streets here, although a strong demand still continues in China, the South Sea Islands, British India and even in parts of Africa.

In 1912, as many as 6,000 rikishas were exported from Japan. Today the number is less than half and it is declining. There were 26,000 licensed rikishas and 96 automobiles in Tokyo in 1901. Today there are 8,700 rikishas and 15,000 automobiles. What was formerly the largest rikisha factory in the world, located on the Ginza, in Tokyo, has been replaced by a baby carriage shop. This plant was founded by Daisuke Akiba, who is considered the inventor of the rikisha.

## What Makes Our Friends

It is not seeing one's friends, having them in reach, hearing of and from them, which makes them ours. Many a one has all that, and yet has nothing. It is the believing in them, the depending on them, assured that they are good and true to the core, and therefore could not be good and true toward everybody else, ourselves included.

**Will Have Office In London**  
An imposing five-story office building and show-room will be erected by the Ontario Government in London, England, at a cost of about \$250,000, it is announced by Hon. G. Howard Ferguson, Premier of the province. The building will have a frontage of 26 feet and will be located on the Strand.

## National Parks Roads

There are slightly over four hundred miles of standard motor roads in Canada's national parks. The mileage by parks follows: Banff, 127; Jasper, 62; Yoho, 50; Glacier, 9; Mount Revelstoke, 19; Waterton Lakes, 20; Kootenay, 63; Prince Albert, 34; Elk Island, 11; Point Pelee, 7; Buffalo, 1.

## Old Klondike

### Is Passing

**Civilization and Modern Ideas Are Changing North Coast**

It is just about 30 years since the magic name "Klondike" rang around the world, and gave rise to the greatest mining "rush" in the world's history, and added more to the wealth of the world in raw gold than has ever been taken from any similar expanse of territory. Mining is still being profitably carried on in many parts of this great Yukon land, but it is on a large and highly organized scale. Old-timers claim that we shall see a return of the days when the prospector, armed only with a pick and shovel and a stout heart, may go forth and dig a fortune from some frozen creek bottom or bench land; but for the present this mysterious land is not so much the Eldorado of the gold hunter as is of the modern tourist who seeks to pick the treasures of romance along its old trails, and to people it again with the strange procession of figures—bizarre, bizarre, wicked, gay, morose, hopeful and hopeless—which once trod its ways and made its brief but striking history.

The primitive civilization which the early pioneers found in this vast country in Alaska and the Yukon remains much as it was. The additions they themselves made to it are little changed, except for the better. The communal lodges of the Indians are still to be seen; and the mining towns of the north are still frontier towns, tempered by modern comforts. They will show you "Snoopy" Smith's grave at Skagway, or the place in Wrangell where "the Single O Kid," a quiet youth of 19, held up a bunch of gamblers and cleaned them out at the point of his steady gun; but in the former place you will also find a most comfortable hotel, and beautiful flower gardens, while Wrangell is now a quaint, quiet town with flourishing industries.

But civilization and modern ideas are stalking up the north coast, and those who would see this country as it was, must hasten. The grotesque totem-poles, the family trees of the coast Indians, are no longer being made, although "reproductions" as of other antiques are coming on the market, but steps are being taken for the preservation and restoration of some of the finest of the old specimens. The Indians no longer make those mammoth war canoes, 50 feet long, six feet beam, with beautiful lines, hollowed from a single tree and capable of holding 50 persons; but they may be seen at Wrangell, Sitka, and elsewhere.

All along the coast, wherever there is any considerable settlement the traveller may still buy fine specimens of the basketry, carved ivory and copper work for which the natives of Alaska are famous.

## Did Not Trust Bank

**Boer Farmer Thought Money Was Safer At Home**

A Boer backslider in a remote part of the Transvaal began to have doubt, owing to native depredations, as to the safety of £300 he had stowed away under his bed. A friend advised him to deposit the cash at a bank in the nearest town and they would look after it for him. The farmer did so, and asked the bank manager what would be his charge for keeping it safe and sound. On being told that far from there being any charge, the bank would pay him £15 per annum, he "smelt a rat," and brought the money back to the farm!

## Knows It All

"We have the advice of Polonius to his son."

"Yes."

"And Lord Chesterfield's letters to his son."

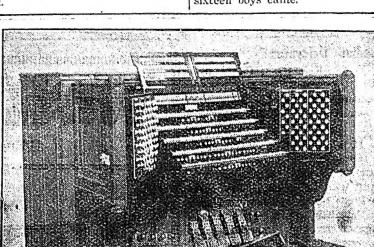

"Well?"

"Have we no wise men nowadays?"

"Plenty of them. But no wise man would attempt to tell his son anything."

**"Have you a pain after eating?"**  
"Yes. When the waiter brings the bill." — Der Gomatische Sachse, Leipzig.

**Image**

## Highest Note in Organs

Wires from this console in the Auditorium of the Royal York Hotel, at Toronto, lead to a chamber behind the stage where the largest and finest organ in Canada, and one of the finest in the world has been installed.

This is the crowning achievement of Casavant Freres whose plant is at St. Hyacinthe, Quebec. The only organ in Canada equipped with five manuals, it consists of six organ units: Great, Swell, Choir, Organ, Bombarde and Pedal. A list of its parts reads like a catalogue of the most complete of organs, which in truth it is. The Great Organ contains 20 stops and 1,761 pipes; the Choir Organ contains 18 stops and 1,346 pipes; the Organ contains 15 stops, 1,083 pipes, 61 harp pipes, 23 tubular chimes, 37 xylophones and 3 tremulants. An electric blower, operated by a motor of 20 H.P., will furnish the wind at the various required pressures for all parts of the instrument, and the same motor will also drive a generator that will supply low voltage current for the working of the mechanism of the organ. The ingenuity connected with the construction of this motor is apparent when it is learned that the Chorus Reeds of the Great and Swell organ-units operate on heavy wind-pressure, and the stops of the Bombarde organ on extra-heavy wind-pressure.

## The Ideal Summer Meal

Save the coupons in the carton  
write for Cook Book and Premium List  
Connors Bros. Ltd., Black's Harbor, N. B.

WORLD HAPPENINGS  
BRIEFLY TOLD

Manitoba contemplates celebrating its diamond jubilee on July 15, 1930, it was announced at Winnipeg by Premier John Bracken.

The London Daily Sketch said Premier MacDonald had refused Leon Trotsky, former Russian war chief, permission to enter Great Britain as he requested recently.

The Japanese naval training cruisers "Amano" and "Takao" will visit Vancouver on August 10-12, it was stated at the Japanese consulate there.

Albert Voight, a German, has left Seward, Alaska, in a 16-foot collapsible walrus skin sailboat for New York. He hopes to complete his 6,700-mile trip in six months.

Charles Colebrooke Patterson, eldest son of the late J. C. Patterson, former Lieutenant-governor of Manitoba, is dead. He was born in Ottawa, in 1868, and for a number of years was his father's secretary.

Flight tests will soon be made of television apparatus calculated by its inventor, C. Francis Jenkins, Washington physicist, to reproduce conditions as seen from an airplane, on a screen miles away.

Japan's co-operation in any disarmament program negotiations that Premier Ramsay MacDonald and Ambassador Dawes may have begun has been promised by Premier Tanaka.

France is preparing to bring into force a wide scheme of social insurance. It will cover sickness, old-age incapacity, maternity benefits and, to a certain extent, unemployment.

Captain A. N. Eames, inspector in the Royal Canadian Mounted Police, who has been stationed at Vancouver for some time, has been appointed inspector in charge of the Arctic sub-district, with headquarters at Herschel Island.

Representatives of all the provinces will be called together by the Federal Government next autumn to consider the federal and provincial financial problems, according to intimations received at the Parliament buildings, Victoria.

## Germans Invent New Ship

Safer and Cheaper Than Existing Models Is Claim

A new kind of ship is being built by a German ship building company, which, it is expected, will be safer and more economical than existing models. The feature of the invention is the unusual shape of bow and stern, designed to press water down rather than to each side, and to reduce friction on the sides. It is said to cause the water to flow by the shortest route from bow to stern. Three high-sea fishing trawlers recently have been built by Deschimag on the new principle. The builders announce that not only is the fuel consumption reduced 25 per cent compared with other vessels of equal size, but that rolling and pitching even in heavy seas is reduced to an extent not previously attained. Test trips also have shown excellent steering capacities.

A Severe Attack of  
Dysentery  
Checked by 4 Doses

Mr. L. Burtonwood, 620-22nd St. W., Saskatoon, Sask., writes: "My child, when only seven months old, had a very severe attack of dysentery, and after three days' treatment with other things we decided to use

On this day his bowels had moved twenty times in eleven hours, but four doses checked it.

"A short time ago we offered it to a woman whose baby was troubled, and it too was relieved with forty doses.

"We both always keep a bottle of Dr. Fowler's handy at all times. This medicine has been on the market for over 80 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1701

## Designs On Totem Poles Are Polynesian Art Of B.C. Indians Similar To That Of South Seas

What strikes one most of all in looking at the arts and crafts of the British Columbia Indians is the general "Polynesian" character of the designs.

The totem poles are obviously related to those of New Zealand, the models of canoes and painted paddles recall the South Seas generally, and in some of the stone carvings there are hints of Easter Island.

On the other hand, the carvings in ivory and horn appear to link in with the early Chinese jades.

If these impressions are just they support the suggestion which has been made of a "Pacific" school of art, antedating the earliest Chinese art; and we might venture that whereas partly through Greek and Indian contacts, Chinese art went on developing, the arts and crafts of British Columbia remained more or less in the Pacific phase.

It is said that the Indians of British Columbia differ from those of other parts of Canada and the United States by a definite Mongolian influence.

Further it is known that the Russians were early visitors to British Columbia, and, sure enough, in the carvings there are distinct affinities with "Scythian" art.

Owing, possibly, to the complete absence of pottery among these Indians, basket weaving appears to be the art that developed most consistently, baskets closely woven of cedar bark being used for cooking and carrying water; and their decoration, generally geometrical, but occasionally representing natural forms—as of the skunk gull—in a convention arising out of weave, through light upon the supposed origin of pottery—out of basket-making, first by daubing the basket with clay, and then by using clay alone, the decorative being transferred from one medium to the other.

## Winnipeg Newspaper Union

464

## THE NEW PEPLUM BLOUSE

Simple blouse of printed blue crepe with peplum shaped so as to give a flat hipline. Shoulders and both trimmings are charmingly feminine details. Style No. 464 can be copied with 1½ yards of 40-inch material, with 1½ yards of 36-inch material, and 1½ yards of 36-inch material.

The pattern which is so easy to understand, can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Off-white ivory tone crepe satin is suitable to wear with black, plaid, silk, rayon, silk or black faille silk crepe jacket costume. Printed voile, handkerchief

linen in lime shade, vivid red crepe de chine and georgette crepe in medium tones, prints in foliage green, alternative ideas, patterned crepe 25 cents in stamps or coin (coin is preferred). Wrap coat carefully.

We suggest that when you send for this pattern, you enclose 10 cents and a copy of the "Winnipeg Fashion Magazine." It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

## A Remarkable Hotel

Built On Swiss Alps and Is 11,480 Feet Above Sea Level

One of the most remarkable hotels in the world is the Jungfrau, perched high up on the Jungfrau, in the Bernese Alps, Switzerland, 11,480 feet above the level of the sea. Built of stone and iron, the hotel is welded, as it were, into the sheer rock of the famous mountain. Snows surround it eternally, and, in winter, it is buffeted by the fiercest blizzards of the Alps. But it gives hospitality and warmth to climbers and to the tourists who visit the mountain by the funicular railway from above Interlaken. From the windows of the hotel lounge one looks out upon a world of clouds, through which some of the high peaks of the Bernese Oberland stand out like rugged islands.

Neary every member of the hotel staff is an expert mountaineer. For though the funicular runs to within a short distance of the hotel there are often long spells during the winter when the heavy snows prevent all communication with the outside world. Then, the only means of reaching civilization is by ski along dangerous mountain tracks. The Jungfrau hotel had its origin in a ramshackle shelter hut built by workers when engaged in the construction of the funicular in 1912. From this dwelling where they ate their simple meals of beer and bread has arisen the hotel that is unique in the world.

## Recipes For This Week

(By Betty Barclay)

## BOSTON STEAMED BROWN BREAD

1 cup graham flour.  
1 cup corn meal.  
1 cup flour.  
1 teaspoon salt.  
1 teaspoon soda.  
1 teaspoon baking powder.  
½ cup sorghum or molasses.  
2 cups sour milk.

Mix and sift the dry ingredients. Mix milk and molasses and add last. When well mixed, fill buttered molds half full. Cover tightly and steam for three hours. Unmold and place in moderate oven for 15 minutes. Serve hot or cold.

## FRUITY CREAM CUSTARD

4 oranges.  
2 eggs.  
½ cup sugar.  
2 cups flour.  
½ teaspoon salt.  
2 cups milk.  
½ teaspoon vanilla.  
5 tablespoons sugar.

Beat eggs well, add ½ cup sugar, flour and salt and mix thoroughly. Add milk and cook in double boiler until thick enough to coat spoon.

Cool, add vanilla and turn into serving dish containing peeled and sliced oranges. Beat eggs-white with 5 tablespoons sugar. Heap on top of custard and serve.

## Canadian Delegates

## For Press Conference

Dominion Will Have Largest Representation At Imperial Meet Next Year

J. H. Woods, managing editor of the Herald, Calgary, Alta., recently called for London, where he will consult with the council of the Empire Press Union in connection with the Canadian contingent of press delegates to the Imperial Press Conference, being held next year. Mr. Woods said that Canada will be sending 20 delegates to represent the 60 members of the Union in Canada. This is the largest representation of any part of the Empire.

The last conference was held in Australia in 1925, and one previous to that, in 1920, was held in Canada. The Imperial Press Conference is being held in London, England, in June of next year.

## How Names Were Given

Europe is derived from Europa, in Greek mythology a woman who was carried off by Jupiter, who came to her disguised in the form of a white bull and bore her to the island of Crete. The Greek word is said to be derived from the Semitic "acri" meaning darkness, evening, sunset. Asia is said to derive its name from the Semitic word "acu" meaning going for, or rise of the sun.

## Trail Riding In Rockies

Trail riding is one of the favorite pastimes of the national parks in the Canadian Rockies. This is one of the best ways of seeing all, or most of the points of interest. In Banff, trail trips of ten, twenty-five, or fifty miles may be taken by the visitor on horses trained to the work and altogether trustworthy.

## AMBASSADOR MAKES DECISION

JUNE 30

Golden Text: "I have loved thee with an everlasting love; therefore with loving-kindness have I drawn thee."—Jeremiah 31:3.

How many Christians there are who, like those priests, are miserable because unsanctified! While on every hand opportunities call for the development of their energies, they are unfitted to lay hold of them.—J. Stuart Holden.

If ever there was a suffering servant, despised and rejected of men, that servant is the Jewish people.—Jewish Chronicle.

Take the task he sends you gladly, I'll help you with your picture if you like. Answer quickly when he calls it.—Daniel March.

With bonds and scars, and evil will The world repulses its prophets still.—Whittier.

He who shows me the achievements of a brother man touches my lips with a live coal from off the altar.

We are the poor judges of form or comeliness, and what is lustuous with perfect beauty in God's eyes may be, generally is, plain and dowdy in men's.—Alexander Macaren.

God's goodness hath been great to thee.

Never a day nor night unallow'd pass.

But still remember what the Lord hath done.—Shakespeare.

## Honor Belongs To England

Frenchman Did Not Originate Idea Of Artificial Silk

Most of the credit for the idea of manufacturing artificial silk goes to France, and the honor has been given to Reaumur, a French naturalist. Actually, the first known suggestion was made by an Englishman, Dr. Robert Hooke. In 1664 he published a book, "Micrographia," in which he described a microscopic examination of real silk, and suggested the possibility of producing a similar thread by mechanical means. The first machine to produce an artificial silk was made in England. In 1840, Mr. Louis Schwabe took out the first patent and erected his machine, embodying spinning wheels, in Manchester, but the product failed to attract and Schwabe committed suicide three years later. Today the spinning machine is in full use, and £135,000,000 is invested in the industry in England alone.

## Hunts Grizzly In Sprink

Hunting grizzly bear in the spring is good sport, according to Walter W. Lang, of Milwaukee, who has returned from the Canoe River country out of Mount Robson, B.C., with one grizzly hide and a couple of brown bears to his credit. It is Mr. Lang's fourth year in this part of the Rockies. He was accompanied on his hunt by Richard Luce, also of Milwaukee.

## Large Area Photographed

Thirty-three thousand, eight hundred square miles were covered in Canada during the season of 1928 by oblique aerial photographs taken by the Royal Canadian Air Force for the Topographical Survey, Department of the Interior.

## Makes For Unemployment

One of the causes of unemployment in Europe is that our working lives have been prolonged, declares a statistician. At one time, he says, "too old at forty" was the cry throughout the world, but we have now found that we are not too old at 60 or 65.

## University of Alberta

The University of Alberta has just celebrated its twenty-first birthday. The first president, Dr. H. M. Tory, now president of the National Research Council of Canada, and the first premier of the province, Hon. A. C. Rutherford, participated in the anniversary ceremonies.

What would you say to anyone who sits himself down on your hat?

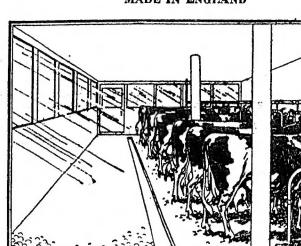

"I should call him an idiot a stupid idiot."

"That's all I wish to know — you are sitting on mine!"

It is no good being good unless you are good for something. The tragedy is not in not knowing, but in not knowing that you don't know.

## WINDOLITE

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light and strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is a natural product—ultra-violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have proved that WINDOLITE is an effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and feeding of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have proved that WINDOLITE is an effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and feeding of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

## TAKE MEASURES TO COPE WITH LABOR PROBLEM

London, England.—Premier Ramsay MacDonald will preside over a cabinet meeting which will have the preparation of the King's speech from the Throne for the coming Parliament as its principal business.

In the domestic field its chief interest will lie in the measures for meeting the unemployment situation. During the election campaign, Rt. Hon. J. H. Thomas, now Lord Privy Seal and minister of employment, gave some indications of Labor's unemployment plans by way of legislation.

These plans are two-fold, namely: 1. Raising the school age from 14 to 15 with allowance to parents. This is estimated to keep normally 400,000 out of industry for a year.

2. Supplementing the pensions of the workers of more than 65 years of age so that they will be able to retire. This, Mr. Thomas estimates, will eventually relieve the labor market of another 350,000.

In Scotland, where the percentage of those in receipt of poor law relief is greater than in England, steps were taken to explore the available employment. The Scottish board of health sent an urgent message to all municipal authorities in Scotland asking them to state if they had any ground suitable for road development in anticipation of housing schemes and particulars were asked of the estimated number of men who might be employed, with the probable date of employment and the estimated cost.

While unemployment is the government's main domestic problem, it is expected the speech from the Throne will announce the appointment of a Royal Commission to inquire into the liquor traffic.

In regard to mines, the government is likely to face an embarrassing situation. "Labor and the nation," a pamphlet issued by the Labor headquarters, stating Labor's program, pledges the party to repeal the Conservative government's act which extended the miners' day from seven to eight hours. There have been urgent complaints that if this act is repealed the mining industry will be disorganized. At the same time the officials of the Miners' Federation are demanding repeal of the eight hour clause. The executive of the federation are to meet the members of the government shortly after parliament opens.

## Report Seeing Huge Meteor

Fall into Lake Superior Says Pro-  
prietor Near Sault

Sault Ste. Marie, Ont.—A strange tale was brought down to the Soot from Michigan Island by Frank Kusick, prospector, who saw a huge meteor about the size of a ship fall into Lake Superior close to the island at 10 o'clock on the night of June 13. The meteor illuminated the island with the brilliancy of daylight and created a rumbling noise which was heard for two minutes after it fell.

Quite a sea arose after the meteor struck the water and the level of the lake rose appreciably.

## Solved All Murders

London Police Report All Murders Solved in 1928

London, England.—Every murder committed in London in 1928 was solved and the culprit was convicted or took his own life, according to the official police report.

The report of the commissioner of police showed that there were 18 murders of persons more than one year old. Eleven culprits were convicted and seven committed suicide, the report said.

W.H. Not Resign

Lynn, Mass.—"I don't intend to get out, and no power on earth can make me. This old age stuff will have no effect on me." Thus did Police Chief Thomas M. Burke, who is in his 84th year and who has been a policeman for nearly half a century, recently answer persistent rumors that he was about to resign.

National Wealth Grows

Ottawa.—The national wealth of Canada, exclusive of undeveloped natural resources, is placed at \$27,887,000 for the year 1927, in an estimate made public at the Dominion Bureau of Statistics. This is an increase of \$100,000,000 over the 1926 estimate.

## Warning Was Disregarded

Cleveland Clinic Told In April That Film Used Was Dangerous

Cleveland, Ohio.—Making no attempt to fix the blame but pointing out that the Cleveland clinic had been warned of faulty X-ray storage which cost 123 lives by fire and explosion, on May 15, Coroner A. J. Pearce completed his inquest after a month of investigation in a report on file with official county records.

The warning was sent to the Ohio inspection bureau of the fire underwriters' investigating service last April. It called attention to the fire hazard in the type of film used at the clinic, urged use of another kind and advised clinic officials that the film, if burned, would generate great clouds of noxious fumes. The film was stored in the basement and was ignited by a means not determined in the investigation.

The report placed the official number of dead at 123. They were killed by a combination of nitrogen peroxide gas with carbon monoxide the coroner said.

## Confesses To Bank Theft

Eighteen-Year-Old Youth Pleads Guilty in Vancouver Police Court

Vancouver.—Arthur Thomas, 18, pleaded guilty in police court to a charge of robbing the Grandview branch of the Royal Bank of Canada, and elected summary trial.

Thomas, who held up five bank employees, a stenographer came to work, was arrested in New Westminster a few hours later and practically all of the stolen money recovered.

The bank was held up as its manager, J. W. Logan, and four other employees were arriving to commence work for the day. Each was accosted as he entered and trussed up by the youthful bandit. He forced the manager and cashier to open a vault free which he seized money, and then left the building by a back entrance. He left his prisoners in a cubicle, the door of which they broke down shortly after his departure.

## Prepare For Another Election

Liberal Party In Britain Sees Possibility Of Another General Contest

London, Eng.—The possibility of another general election in Great Britain at no distant date is being taken into account by the Liberal party, which holds the balance of power in the new parliament. The Liberal administrative committee passed a resolution moved by Sir Herbert Samuel, chief organizer, "to maintain and strengthen the organizations in the constituencies."

It was also resolved that "when ever an appeal is made to the country the elections will again be strenuously contested by the Liberal party."

## Health Authorities Conduct Investigations

Hundred People In Bowmnville, Ontario, Suffer From Plague

Bowmnville, Ont.—Health authorities are taking extra precautions and conducting investigations as the result of the second outbreak of plague poisoning here in four days, during which over 100 persons have been affected in varying degrees.

The first outbreak occurred when scores of children and adults were poisoned by contaminated milk. The second and more violent cases occurred at a Sunday school entertainment and supper. Tainted salads are believed to have caused the outbreaks.

## Gets Month's Reprieve

Ottawa.—A reprieve until July 10, has been granted to John Ivanchuk, convicted of murder, who was sentenced to hang on June 21. Cabinet, having considered the case, has decided to put the execution off for a month. In the meantime it is expected that new evidence bearing on the case will be submitted to the federal authorities for consideration. Ivanchuk was convicted of the murder of License Inspector Harry Constable at Cochrane, Ont.

## Forty Believed Drowned

Bogota, Colombia.—Forty persons are believed to have drowned and more than 100 injured in the practically total destruction of the town of Sevilla by floods from the Quindio river after a landslide from a hill into the river had caused it to change its course. Sevilla, the latter's name, on the left. The Prince is returning to England by Canadian Pacific Steamship and Railway from Japan.

## May Revise Tariff

Drastic Changes Considered By Dominion Government Is Report

Toronto.—The Toronto Globe published the following despatch from its Ottawa correspondent:

"Tariff changes which will have a revolutionary effect on Canada's external trade, are under consideration by the Dominion cabinet. In response to demands from all parts of the country for action, the government was taking preliminary steps toward what will undoubtedly be the most drastic revision of fiscal policy of the present century.

"Present prospects are that the vital changes will take the form of a material increase in the British preference, if not the inauguration of complete free trade on the bulk of British or Empire goods, while the general tariff, which applies to imports in the United States will remain stationary."

## DRIVE AGAINST RUM RUNNERS ALONG BORDER

Windsor, Ont.—With a warning by Attorney-General Price that crime would not be permitted within the borders of the province of Ontario and with the United States blockade tightening, rum runners are continuing their activities along the border. Reports told of feverish activity at the export docks as cargoes of liquor destined for United States river and lake ports were being loaded.

Around the reports of the kidnapping of a newspaper photographer and revolver battle between rum-runners and a United States custom patrol cutter, Attorney-General Price announced that if necessary he would double the provincial police along the Windsor Falls sector to protect Canadian citizens.

It is along this section of the border that the battle lines are most closely drawn due to recent strengthening of the United States preventive forces.

As a result of the statement of the attorney-general, the rum-runners may find their activities on the Canadian side of the line more restricted. The attorney-general was emphatic that crime would not be permitted within the borders of the province.

Meanwhile, reports from border points indicated that despite the drive against the rum-runners, activity at the border export docks continued. Rum-runners were reported active at many points.

A party of rum-runners engaged in a pistol battle with a United States customs patrol cutter, the cutter being forced to return to port after being peppered with bullets, while the rum-runners retreated to the Canadian shore. The rum-runners crowded behind bags, apparently filled with liquor, as they exchanged shots with the customs men.

At Dunkirk, N.Y., two men were arrested when a United States coastguard boat captured a motor boat loaded with rum.

Two recent developments were planned before Dominion government officials. The department of external affairs received a report on the kidnapping of a private speed boat, not engaged in the liquor traffic, was fired by a United States patrol boat. Should further investigation warrant, the department will investigate this affair. The department of national revenue was notified of the kidnapping of the photographer of a border cities newspaper but the opinion was expressed that it did not come within the scope of the department.

Trotsky Would Enter U.S.

Constantinople.—Leon Trotsky, exiled Soviet leader, intends to apply to the United States government for permission to enter the country, according to reports current here.

## Prince at Garden Party

Prince Henry, third son of the King, receives at a garden party held in honor of His Majesty's birthday, at Victoria, B.C. Lieutenant-Governor Randolph Bruce is on the right and Miss Helen Mackenzie, the latter's niece, on the left. The Prince is returning to England by Canadian Pacific Steamship and Railway from Japan.

IN BRITISH CABINET

Margaret Bondfield, successful Labor candidate, is the first woman to be appointed to a British cabinet. She is the new minister of Labor.

## Cabled French Airman

Paris—Jean Assolant, Rene Leveque and Armando Lotti, Jr., received by cable congratulations from Col. Charles Lindbergh, for their trans-Atlantic flight from Old Orchard, Maine to Comillas, Spain, in the Yellow Bird.

The colonel's message, addressed to all three of the aviators, said: "On returning to New York I have just learned of your successful crossing. Please accept my sincere congratulations and best wishes."

The French fliers immediately cabled him in reply:

"We thank you heartily for your affectionate telegram. Our greatest claim to glory has been to have followed the route you traced two years ago with incomparable mastery in your flight from New York to Paris."

"Your magnificent example of courage, of tenacity, of science as a pilot and navigator guided us every instant of our route. We address to you our most cordial and respectful salutations."

## WILL NOT FOLLOW LEAD OF U. S. IN SHAPING TARIFF

Grand Bend, Ont.—Independence of action on tariffs is the policy of the government, and upward revision of tariff schedules by the United States, being a matter entirely for the United States to decide, calls for no retaliation or reprisal on the part of the Dominion. This was the keynote of addresses by Hon. Ernest Lapointe, minister of finance, Hon. J. C. Elliott, K.C., minister of public works, and Hon. W. D. Elder, minister of national revenue, who spoke at a picnic here under the auspices of the South Huron Liberal Association.

Mr. Lapointe made extended reference to policies advocated by Hon. R. B. Bennett, Conservative leader, at present on a tour of western Ontario.

"The remedy he suggests is that we should adopt American methods in our fiscal policy," Mr. Lapointe said. "But our ideas and ideals are Canadian and British, and we won't follow American methods. We will shape our policies, fiscal and otherwise, at Ottawa. We won't take them from Washington."

"We are satisfied with Canadian methods and British doctrine and it is necessary for us to find other outlets for our trade. We always have in mind the Canadian interests. Since 1921 have not the Canadian people been satisfied with the way our financial policies have been shaped under Mr. Robt., whose budgets we are proud to mention during the last election?

"We have not been dictated to by American theories. We have tried to meet the problems of Canada as conditions were at the time. British preferential trade treaties have been part of our policy."

"The Opposition lately has been coming to adopt that policy, but the fathers of British preference were the late Sir Wilfrid Laurier, and the Rt. Hon. W. S. Fielding. From the start it was successful and our exports to Great Britain increased \$75,000,000 the first year. Last year they reached \$446,000,000 and we bought only \$193,000,000 of British goods. But if you expect the nations of Europe to give you trade, you must buy from them. Trade, after all, is exchange."

"In view of the figures I have quoted I cannot understand the complaint from some quarters about British goods coming here which they have had to sell us. We have concluded forty-three trade treaties with other nations and our exports as a result were \$220,000,000 in 1923."

"We will continue to shape our financial policies on a national basis in the interests of all sections in Canada," Mr. Lapointe continued.

"We will legislate not for one class, but for all classes and groups of the Canadian people. A country which is as large as Europe cannot hope to live to itself, nor to erect barriers with the rest of the world. The future is with us."

"Let us not look at the past for reasons of doubt and despair, but to the future for reasons of hope and belief. God and nature are with us and nobody is able to fight for long against God and nature. Our guarantee of success is within ourselves. We continue to improve our method of production and you may be sure our prosperity will continue."

## PREDICTS WHEAT PRICES WILL BE HIGHER 1929-30

Washington.—Using condition reports received from all over the world, the United States Department of Agriculture announced that, exclusive of Russia and China, a world wheat crop five per cent. smaller than last year was to be expected for the 1929-30 season.

This reduction, the department said, would probably be more than offset the 1928-29 carry-over and it therefore seems likely that world market prices for wheat through the 1929-30 season will average something higher than they have through the 1928-29 season."

The department summary of prospects was made up from seed, winter killing and areas remaining for harvest up to June 12. The area to be harvested was expected to remain approximately the same as that of the past year, but higher crop production reported to date were expected to be more than offset by lower yields in Canada, Argentina and some European countries.

The carry-over, the department said, would likely be about 150,000,000 bushels in excess of the stocks on hand July 1 last year. In the United States the carry-over may be as low as 225,000,000 or as high as 270,000,000 bushels by July 1, depending on how much will have disappeared, as feed or in other ways not accounted for.

The year began with an estimated crop of 903,000,000 bushels and a carry-over of 129,000,000, making the domestic supply 1,090,000,000 bushels. Exports to July 1, were estimated at 100,000,000 bushels as compared with 206,000,000 bushels exported last year.

## Fatal Airplane Crash

Three Meet Death When Seaplane Plunges Into St. Lawrence River

Montreal.—Captain the Hon. J. C. Jervis, M.C., 32, elder son of Lord St. Vincent, and "former aide-de-camp to the Governor-General of Canada, and two companions, were instantly killed when a seaplane crashed in the St. Lawrence River between Point St. Charles and Nun's Island.

The other victims were Pilot C. S. Caldwell, of the Canadian Vickers, and Dr. Wm. D. Morris, 28, of Montreal.

The plane was flying down the river at a very low altitude when it struck two high tension wires carrying electric power from the city to Nun's Island.

According to eye-witnesses there was a burst of flames just as the machine crashed into the water and burned over.

Rescue parties were quickly on the scene, but without the necessary facilities for getting at those imprisoned in the cabin of the plane, and it was nearly two hours before the first body, that of Dr. Morris, was taken out. Two hours later, the body of Captain Jervis was recovered.

Dr. Morris came here two years ago from Victoria, B.C., where his parents reside. He was graduate of the University of Alberta and McGill.

## Experiment Fails

Hong Kong.—Armed aviators carried out rain-making experiments above Hong Kong, dropping a chemical known as "Dieldol" from the clouds. The experiments were not successful. Hong Kong is suffering from severe water famine necessitating drastic action to replenish supplies.

## Air Line Crash

Lydd, Eng.—The coroner's inquest on the four victims of the air line "City of Ottawa" crash into the channel, returned a verdict that the persons had lost their lives by drowning caused by the accidental fall of the aeroplane into the channel.

## Luks Authority

Ottawa.—The execuque court has given judgment that the Sun Life Company has not the authority under its charter, to increase its capitalization from \$2,000,000 to \$1,000,000. The judgment has been issued by Mr. Justice McLean.

## Receives Honorary Degree

New Haven.—Hon. Vincent Massey, Canadian minister to Washington, had conferred upon him the honorary of doctor of laws, by Yale University.

## Consumption Of Wheat Found To Have Declined Considerably In Recent Years

Is wheat bread no longer the staff of life it used to be? Statisticians whose business it is to look into the matter and find that the consumption of wheat has shrunk from 5.6 bushels per capita in 1913, to 4.3 bushels per capita in 1926, into the cause of this decline the United States senate has ordered the secretary of agriculture and the secretary of commerce to investigate. These two departments of the Washington government are to report to the senate not later than the beginning of the session of congress which meets in December.

The result of that inquiry will be interesting to all countries in which wheat is produced on a large scale, and to no country more than to Canada. They will be curious to know if people are changing their habits of eating, and are finding more satisfaction in supplementing their grain food by other edibles. That there has been a remarkable increase in the consumption of green vegetables and fruits and of preserved vegetables and fruits is a notorious fact, but it would be surprising to learn that the consumption of these foods has gained upon the consumption of wheat products so as to displace almost 25 per cent. of the latter. Green vegetables and fruits in the form of salads have undoubtedly taken a considerable percentage of the demand that formerly went to meats, but their part in lowering the consumption of bread was not generally suspected to be great. Yet let any observer of people who take their lunches at cafeterias speak and he will probably say that it is note-worthy how generally they pass by the bread rolls and biscuits to fill their order from other edibles.

Tastes change, new appeals to the appetite are brought forward, and the advice of dieticians is being followed as it never was followed before. It seems improbable that the decline in the consumption of wheat bread is owing to enforced frugality. A very large part of the world's population can afford better means than they could before the war. If it appears to be the case, people diversify their foods more than in former times, the hint should be taken by our western farmers to diversify their agriculture and produce more kinds of foodstuffs than they now produce. Mail and Empire.

### Moose Jaw a Milling Centre

Is Now the Second Largest Milling Centre In Western Canada

Moose Jaw is now the second largest flour milling centre in Western Canada. The Robin Hood Mills produce 4,000 barrels of flour, 1,250 cases of cereals and a heavy tonnage of standard stock foods every day. Moose Jaw is also the Prairie live-stock centre and headquarters of the Saskatchewan Feeder Show and Auction Sale, with 3,000 head of cattle and 10,000 sheep on show and sale every October.

### The Wrong Tickets

It was dusk and the ticket inspector went to the young couple on the back of the bus.

The youth, slightly impatient at the interruption, thrust out his folded tickets.

"We do not stop there," said the inspector courteously.

"Where?" inquired the youth.

"At the paymaster's."

First Woman—My husband is so nervous. If the slightest thing goes wrong he loses control of himself. I hope yours isn't like that.

Second Woman—Mercy no! Bob is as hard to rattle as a feather pillow.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

### Realizes Importance Of Canadian Trade Treaty With Dominion

France may make another trade treaty with the Dominion. France regards Canada as one of the best fields for monetary investment in the world and realizing the importance of the Dominion appears likely soon to enter into another trade treaty with this country, wider in scope than the one now in effect, in the opinion of Hon. Philippe Roy, Canada's minister to France. Mr. Roy was in Vancouver, planned a trip to the Peace River District before returning to France.

Both France and Canada appear to realize the advantages of further mutual trade concessions said Mr. Roy, and a growing trade between the countries can be expected. Mr. Roy also visited Edmonton, which was his home prior to 1911.

"I want to see all of this country that I can," he said, "because I am going to do a great deal of talking about it when I return to France."

### If People Had Time

#### Many Have Delusion That They Could Become Famous

Isn't it funny, too, how many of us harbor delusions that we could become famous or wealthy if we had time. We think that we could write a novel, or a play, or maybe a movie scenario—if we had time. Or perhaps we could develop a new rose or a gladiolus, or an iris, that would make our name known throughout the horticultural world—if we had time. Or we might write poetry—if we had time. All these make pleasant dreams, but each of us has "all the time there is" and it is most likely that, if we were forced to do a chance, we would suddenly begin to do the things we have always thought we wanted to do.

### Winnipeg Newspaper Union

NOVEL TWO-PIECE DRESS

Novel ideas now appear on frocks for the younger maid-servants. In Style No. 675 for instance, the soft-waist blouse with inset chemisette is gathered into band at lower edge to affect smart truck in type. The two-piece skirt with platted insets, is patterned in blue and white voiles, printed sateen, beige and beige jersey, printed and plain silk crepe, dainty printed wool challis, colorful rayon and wool crepe are smart and distinctive.

Prices range in sizes 6, 8, 10, 12 and 14 years. For the 8 year old miss 1 1/2 yards of 40-inch material with 5/8 yard of 36-inch contrasting, and 5/8 yard of lining is all that is needed. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

### Poultry Registration

Growing Demand For Stock Of Registered Parentage Is Shown

The Egg Laying Contests carried on by the Federal Department of Agriculture at the central farm, at Ottawa, and at certain of the experimental farms throughout the provinces, has for one of its chief objectives the discovering of qualifications in individual birds for registration. In a report of the eight contests that have been held up to the end of 1927, issued in Bulletin No. 108, of the Department of Agriculture, at Ottawa, it is shown that 4,492 birds had qualified for registration. Of these, 4,130 were females, and 363 males. Females to qualify for registration are required to lay at least two hundred eggs weighing at least 24 grams to the dozen during the fifty-one weeks under test. A male to be eligible for registration must be the son or grandson of a registered female, and his sire and grandsire must have been approved male birds, or the son of a registered male, and at least a second generation registered female. Both males and females are also required to pass inspection as to standard qualifications, constitutional vigour and breed type. This report indicates an enthusiastic appreciation of the registration work which is shown by the increasing numbers of birds entered for test each year and the growing demand for stock from registered parentage.

### Importing Sheep From England

Five Head From Royal Flock Purchased By B.C. Breeders

Sheep from the famous flock of His Majesty, King George, are being imported on Vancouver Island and will soon arrive at their new pasture in the Sooke Hills.

C. E. Whitney-Griffiths, director of the Canadian Sheep Breeders' Association, who with his brother is one of the largest purebred-sheep breeders in British Columbia, purchased five head from the Southern flock which was started many years ago by the late King Edward, then Prince of Wales.

Introduction of new blood is said to be urgently needed to improve the flock in this province, and nowhere can this be better obtained than by the importation of pure-bred stocks from some of the noted sheep districts of the old country, according to breeders at Victoria.

### Exhibit Canadian Furs

Proposed To Send Collection To Fur Exhibition At Leipzig, Germany

An exhibit of Canadian furs valued at \$75,000 will be included in the fur exposition in Leipzig, Germany, this summer, if plans of leading Canadian buyers mature. Consideration is now being given by Hon. James Malcolm, Minister of Trade and Commerce, to a proposal that the Government bear the expense of erecting and staging the exhibit. A collection of the most beautiful furs produced in this country is being made for the purpose.

### Poison Gas

A monument was recently unveiled at Steensmoe commemorating the first German attack with poison gas. The inscription reads: "On April 22, 1916, the troops of the 57th Territorial Infantry Division and the 45th Infantry Division were poisoned by the first cloud of gas. Since then, the victims of that abominable method of warfare have died every day in peace time."

### For Land Settlement

J. F. Weston, vice president of the Colonization Finance Corporation of Canada, Ltd., and managing-director of the Imperial Life Insurance Company. The Colonization Finance Corporation has entered into an important agreement with the Canadian Colonization Association for the settlement of privately owned lands, says the Department of Colonization and Development, Canadian Pacific Railway.

### Solves Old Problem

Geological Survey Tells What Becomes Of Rain Water and Snow

What becomes of the rain water and snow?

The question has been answered by the geological survey of the department of the interior, at Washington, after a three-year study of the Superior Basin, in Connecticut, which is regarded as a typical area.

Of about 44 inches of water that falls annually in the basin as rain or snow, 21 inches flows out through streams. Twenty-three inches of it is returned to the atmosphere by the process of evaporation from the soil, water surfaces and surface objects, and from being drawn up by roots of plants and given off through their leaves.

Of the 21 inches that is carried away by streams, 12 inches never gets into the ground but immediately runs off, while about eight inches of the river water first finds its way underground and reappears in springs and seeps.

### Encourage Sheep Raising

Project Launched In Manitoba To Raise More Sheep On Farms

The plan recently launched by Lieutenant-Governor J. D. McGregor, of Manitoba, to place more sheep on the farms of the province, and which led to the formation of the Manitoba Livestock Credit Company, to finance the project, is making headway in the Brandon area. A committee has been appointed, with J. C. Riddell, manager of the Canadian Bank of Commerce, as chairman, to handle applications for sheep. The committee reaps no pecuniary gain and railways, banks and other large financial bodies are backing the project.

### A Real Optimist

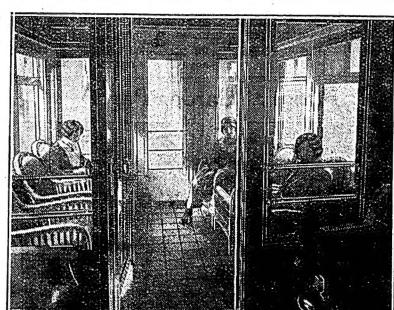

"Now, young sir, what is it you want?" said an old woman who entered a coffee stall to a little sheep boy.

"Nothing, missus," replied the lad; "I just come to see what I might have got if I hadn't lost my penny!"

"Hey, there, don't you dare park that car of yours near my house."

"Don't worry, I know the city rules are not to park near a plug."

### SUN PARLORS FOR CANADIAN TRAINS

Parlor cars with glassed-in observation platforms are the latest addition to the equipment which the Canadian National Railways are using on their trains between Winnipeg and Duluth and the boat trains between Winnipeg and Port Arthur. Vita glass is used in these sun parlor cars, this type of glass letting in 75 per cent of the sunlight rays—the health-giving part of sunlight—which are not able to pass through ordinary glass. The size of the windows permits unobstructed vision of the scenery and the cars have been tastefully decorated and furnished. They represent the most up-to-date type of rolling stock in use on the continent.

### American Universities To Put On Special Course For Criminal Research Work

#### Buffalo Herd Menaced By Wolves

##### Pack of Wolves Play Havoc With Buffalo In Slave Lake Reserve

Wolves are taking a heavier toll of buffalo from the Slave Lake reserve than Indians or disease, states J. G. D'Aoust, former warden in the reserve, who has just reached Edmonton from the north.

There is one pack of wolves in the park, between ten and fifteen in number, which kill upwards of a hundred buffalo each year, despite the efforts of the ten guardians who are continually hunting the great killers. D'Aoust was stationed on Slave River, 35 miles north of Chipewyan and patrolled a line some 60 miles in length. In this section alone he found the remains of 110 buffalo that had been killed by timber wolves during the past winter.

Although upwards of 10,000 buffaloes have been shipped into the reserve by the government, D'Aoust declares that at the most there are not over 5,000 animals here now, including the original herd of 1,500 wood buffalo. He estimates that 75 per cent. of the yearlings shipped in have died from injuries received in transit and the files which they had to face on being freed.

Indians living on the area enclosed by the reserve at the time it was set aside are permitted to continue to trap and hunt there, but they cannot kill any buffalo. It is very rarely that they break this regulation. Whites are not allowed to hunt or trap within the reserve.

#### Using Lumber From B.C.

##### Japan Takes Millions Of Feet Yearly For Making Bathtubs

Millions of feet of British Columbia lumber are being used each year in Japan in the manufacture of bathtubs, according to a Vancouver man who recently visited the Orient with a view of the disposal of Canadian lumber.

"The Japanese," he stated, "are devoted to bathing as a sort of pastime. The Japanese who does not take a bath once or twice daily is a rare individual. Every house, even the smallest cottage, possesses a bath tub of some sort. They use 150,000 feet of lumber in manufacturing tubs, and this is much British Columbia fir or cedar."

Most of the Japanese cling to the habit of sleeping on the floor, and for that reason they prefer British Columbia hemlock rather than fir for flooring, because there is not so much resin in the wood and it does not silver when dried out.

Leather shoes are the footwear only of the rich. The great masses of the Japanese wear wooden shoes or "gita." The gita absorbs perhaps one-fourth of the wood for each pair, nearly a million feet of lumber being used annually for this purpose.

#### Decline Of Oratory

##### Debates In Parliament Are More Business Like Than Formerly

The fact that orators are now few and far between in Canadian public life—in marked contrast with the number who flourished in the decades immediately preceding Confederation—is quite often made the subject of comment. But it cannot be denied that the proceedings of the several Parliaments of the Dominion are now conducted in a much more business-like manner than was formerly the case and that in spite of the decline in oratory, the tone of debate is much happier and less vitriolic than was formerly the rule.—Brockville Recorder and Times.

#### Canadian Grasses

##### Scientific Study Will Result In Increasing Value Of Pastures

The scientific study of Canadian grasses has brought such good results that the Canadian farmer, in certain circumstances, will be able to triple the value of his pasture, Dr. Frank T. Shutt, Dominion chemist from Ottawa, told the Dominion Chemical convention at Toronto, in the course of an address on the subject of the experimental farms.

Sunday School Teacher (reading of the deluge): "And then it rained for forty days and forty nights."

Bright Pupil: "And were the farmers satisfied then, teacher?"

The man who pays his debts promptly is wise enough not to owe much.

Indignant at the growth of crime on its body politics, its reputation smirched by the smoking guns of gangsters, the City of Chicago will evict its own potential deliverer—the super-detective.

This creature, heretofore only a myth of fiction, will be made into flesh and blood to replace the policeman whose chief qualification often is but a stout heart.

Two of America's leading universities, both in Chicago, have hung up handwriting on the wall for the heretofore undetected murderer, thief, firebrand, kidnapper, racketeer and other transgressors on the peace and comfort of society. Police work will henceforth be a part of the curriculum at Northwestern and Chicago universities—and racketeers Chicago will be their research laboratory.

August Vollmer, chief of police at Berkeley, Calif., will head the new department at Chicago, and will inaugurate the course at the beginning of the fall semester next October. Leonard White, professor of administration and chairman of the local community research committee at the university, who worked on the plans with Chief Vollmer, said that while the course will be confined at the outset to the problems of police administration, it will become eventually a major study in which the student may work for a degree.

Every avenue of learning that can aid in the tracking down of a criminal will be thrown open to the embryo detectives, White said. The course eventually will be designed to permit special study of one or two years as well as the full four-year college course for those who wish it.

An inter-departmental committee will co-operate with Professor Vollmer to see that his students are well-grounded in all the sciences necessary to intelligent investigation.

The student undertaking the full course will study the chemistry of poisons, criminology, sociology, psychology, physics and anthropology and learn to apply the studies to the investigation of crime.

#### West Produces Finest Wheat

##### German Miller Has High Opinion Of Wheat Grown In Western Canada

What from the Prairie Provinces of Canada is the finest received in Germany from any country in the world, according to Johann Lange, one of the seven German millers making a tour of the North American wheat-growing and milling centers. "Canadian mills are second to none if mills visited in Winnipeg may be accepted as representative of Canadian plants," said Mr. Lange. "In operation, cleanliness and the beauty of the flour turned out we have seen nothing better since we arrived on this continent."

#### Starred Ten Years Ago

The movement for the preservation of national historic sites in Canada dates back to the year 1919. Proposals were made then to the Dominion Government urging the necessity of a national organization for the preservation of historic sites and as a result an honorary Historic Sites and Monuments Board was created. This board is composed of a number of eminent Canadian historians who have given their services without compensation.

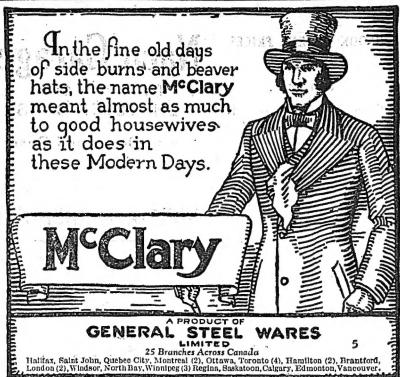

Read To Sheritt-Gordon Mine

With the roadbed complete, laying of steel on the 42 miles railway branch, Cranberry Portage to Cold Lake, to serve Sheritt-Gordon, has started, and by the end of August the job should be near completion. Sheritt will then take in its 1,500-ton mill.

"Mother, that lady must be very poor."

"She hadn't enough cloth to make a coat, and she had to lengthen it with pins."—Lustige Kolner Zeitung, Cologne.

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

### CHAPTER I.

Cool gray dawn of a work day in the modern Babylon—New York! The black curtain of night rose silently, seeming to trail ghostly spirals of mist. Against the sky's flat monotone the irregular and fantastic shapes of the skyscrapers stood out boldly—powerful and mysterious creations of Man.

In the dark canyons of the city streets dark figures moved purposefully toward their destination—factory hands with lunch kits tucked beneath their arms, sidewalk steel-construction men who carried the pride of craft in their way of walking, slim girls with the vivid memory of the night's romantic dreams still shining in bright eyes.

But up town, in the glittering play-places of the city, was a sharply contrasting scene. In the "roaring forties" and "fifty fifties," where dozens of Broadway and fashionable Park Avenue "make whoopee" through the sleeping hours, the night clubs were ending their day. Through the tinsed doorways came lovely ladies in ermine coats and jeweled slippers, and men with silver-tipped walking sticks, and top hats at rakish angles. Their heavy lassiness was broken occasionally by hysterical laughter.

In the lobby of the resplendent Plaza Club, Marcus, the revue producer, helped a pretty young actress into her fur coat. As he did so his arm went around her languishingly for a moment, while she turned her graceful head and glanced knowingly into his eyes. Another man and girl of the Marcus party waited nearby.

"Well, let's call it a night," suggested Marcus, his hand resting affectionately on the girl's arm.

"No—please! Let's not go home. We can have lots of fun yet."

Her tone was wheeling, her smile gay. She was playing up to Marcus, first, because he was the great Marcus, secondly, because she wanted her own way. And now she turned to the other couple.

"Don't let him send us home yet," she said in the tone of a spoiled child. "We're having fun. We can go to some other place."

The other man and girl nodded, and the actress turned to Marcus. "You see!"

Marcus sighed, then made one last stand.

"All the other places will be closed," he insisted.

"No, they won't. Blackie Joe's is open—the fun is just starting down there."

The revue producer made a grimace of distaste. "But that's such a dump."

Suddenly the actress seized Marcus by the arm and led him toward the doorway. She spoke rapidly and soothingly into his ear:

Marcus acquiesced with a faint smile and a characteristic shrug of the shoulders. The chauffeur of his handsome limousine sprang to attention and swung the car door open as the party came down the steps. They stepped inside and the car purred away.

Inside, Marcus felt the girl's head on his shoulder. He put up his hand and stroked her glossy hair, keeping his eyes straight forward. He, like her, but he liked many women. Primarily, this shrewd revue creator was interested in women as talent for his gorgeous productions. His gift for "spotting" talent had made him Broadway's most notable figure in his line. To be "discovered" by Marcus meant fame for any girl.

The car drew to a stop before the shabby exterior of Blackie Joe's place; the party mounted the narrow, unpainted, somewhat rickety stairs; at the top the peep-hole of a locked door was pushed aside in response to Marcus' knock. The suspicious eyes of the door-keeper looked them over, then cautiously swung the door back.

Inside the tiny lobby they surveyed through another doorway a smoke-filled room and a crowded dance floor, where closely massed figures undulated to the muffled but insistent rhythms of jazz music. An odor of stale beer greeted them and again Marcus made a grimace of distaste, which he quickly stifled. When the cheek girl had taken their wraps they moved toward the main room.

This was slumming with a vengeance, thought the fastidious Marcus. In contrast to the brilliant and richly upholstered club they had just left this hideaway of the down town back streets seemed strangely threadbare and woe-begone.

The producer did not like the appearance of some of the patrons. As his party entered the low-ceilinged main room the dance music stopped and the couples threaded their way back to their tables. A curious and rather sinister quietness pervaded the room for a moment; Marcus and his expensively garbed friends were met by lowering stares that seemed threatening.

Marcus' keen, darting glance caught the covetous gaze of a man at a nearby table fixed on the heavily jeweled hand of his actress friend. Without a word the producer stepped in front of her protectingly. And then—

Suddenly the figure of Blackie Joe himself appeared across the room. He strode toward them rapidly with his best welcoming smile.

"Well, Mr. Marcus, this is a great honor!"

Marcus relaxed with a sigh of relief and took Blackie's outstretched hand. Blackie turned toward the back of the room, calling:

**Too Much Acid**

You will never use crude methods when you know this better method. It is usually excess acid. Correct it with an alkali. The best way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

"Hey, Al! Ringside table—for four!"

Al Stone, the head singing waiter and prize comic at Blackie's place, spun about. From their appearance these were important people.

"This way, ladies and gentlemen. Here's a nice spot."

The party relaxed about the round, white-topped table. Then Marcus, czar of the Broadway revues, turned to give the order. He looked up into the handsome, intelligent face of Al Stone, the obscure performer. As he did the actress next to him whispered, "Four beers!" Marcus nodded and repeated the order to Al.

The waiter straightened up and looked about for Blackie. These people were important, but he couldn't fill the order until he had the high sign from Blackie. He caught Blackie's eye and saw his right hand go up with the okay gesture. Then he turned away.

Who were these people he wondered, toward whom the boss behaved so deferentially? Well, it didn't matter. You could see, to look at them, they had plenty of jack. Later he would sing one of his best comic songs for them. They would probably loosen up with a good tip.

Someone else was speculating on the Marcus party, too. In the background, several tables away, stood Grace Farrel, the cigarette girl, her slim fingers resting on her tray, which was suspended from her shoulder by a wide ribbon. Her eyes were wide with awe, as she had heard Blackie Joe whisper the words, "Marcus of Broadway."

So this was the legendary Mr. Marcus, who made performers famous. But the thoughts of little Grace were not for herself. They were for Al Stone. Even as Al leaned over to take the Marcus order her gaze had been alight with admiration for the singing waiter. If only Mr. Marcus knew how smart Al was, how funny he could be, what wonderful songs he wrote!

She tried desperately to catch Al's eye. She must reach him and tell him the name of this distinguished personage!

(To Be Continued.)

### Fighting Battles of Humanity

Science Playing Important Part In Lengthening Span Of Life

At first glance it may sound fantastic to say that 100 years will be the prime of life, but it should be remembered that such an age was comparative youth in Biblical times. We have gradually shortened the life span as we have adopted artificial modes of living, unsuitable clothing and ruinous dietary habits. Easy living has also played its part. Nature was given a chance in Old Testament days. There is little chance that the public will ever be induced to go back to the natural mode of living which made such men as Methuselah possible. A substitute, however, is arising for Nature, and its name is Science. This great modern force is fighting the battles of humanity; it is, attacking man's greatest enemy, disease, and it is winning its fight. Almost daily, new discoveries come to light which make us safer from the ravages of harmful bacilli, which show us how to avoid contagion, and which fight disease, once it is contracted. This work will go on and on, and it is on this fact that Professor Klotz bases his prophecy.—*Border Cities Star.*

**Time Has Tested It.**—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved itself to be a thousand times in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap imitation.

### Britain Likes Canadian Honey

Is Growing In Popularity Says Assistant Trade Commissioner

"Honey is fast becoming a staple food on the British breakfast table, and the Canadian product is enjoying a growing popularity," writes Lester S. Glass, assistant trade commissioner at Bristol, in an article in the "Commercial Intelligence Journal." White clover honey and orange blossom honey are well thought of and South American white honey enjoys a high place in the estimation of the buying public. The British statistics for the calendar years 1924 and 1927 show a total import of honey of 73,251 cwt. and 84,415 cwt., with a value of £201,962 and £221,067 respectively.

"I did what I could, Tony—I told her you had more money than sense."

"And what did she say?"

"She asked me if you had any money?"

Use Minard's for the rub down.

## "Skinny" Women! Gain Weight Quick

New IRONIZED YEAST adds pounds in few weeks. Results guaranteed—or pay nothing

Why let a "skinny" look, tony limbs and ugly hollows ruin your charm? Ironized Yeast adds 5 to 15 pounds often in few weeks; clears your skin; banishes wrinkles gives you new strength. People who have used Ironized Yeast have said—how does Ironized Yeast work?

Ironized Yeast is two times the iron in yeast. Weight-increasing YEAST treated with two kinds of strengthening, blood-enriching IRON used for years by high-class medical authorities. The Yeast is also treated with Violet Rays to increase its effectiveness.

Only when Yeast is Ironized is it most effective. Iron is needed to bring out the weight-building, strengthening virtues of Yeast.

Please eat more. No "yensty" taste. No fat or heat.

No excuse to stay "skinny" weak or plump. Feed and look years younger. Get the size treatment of Ironized Yeast for your diet. It is delicious, taste-free and digestible. If not satisfied with quick results, get your money back.

If inconvenient to buy from druggist, send \$1.25 direct to Canadian Ironized Yeast Co., Ltd., Port Credit, Ont. Dept. 426-MX.

### Turner Valley Oil

Now Producing at a Rate of Over \$30,000 Barrels Annually

In April, 1929, the Turner Valley produced 54,904 barrels of crude naphtha, and 14,303 barrels of crude oil, making a total of 769,207 barrels of oil and naphtha during the month. This is at the rate of over \$30,000 barrels annually compared with 48,000 barrels in 1928. From the present rate of increase it seems likely that the Turner Valley will produce well over 1,000,000 barrels this year.

Turner Valley Oil

Watch the Health Of Your Little Ones At All Times

No mother can expect that her child will escape all the ills to which babyhood and childhood are subject, but she can do much to lessen the chance of disease. The best way for a mother should be constantly on guard to prevent childhood ailments, or if they come on suddenly as they usually do, to know the means at hand to treat them. Thousands of mothers have found Baby's Own Tablets the ideal remedy for little ones—thousands of mothers always keep the Tablets in the house as a safeguard against the sudden illness of their little ones.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels; sweeten the stomach and the bowel constipation; and induce a sense of well-being.

They are little things that leave no little regrets. I might have said kind words, and perhaps have done kind actions to many who now are beyond the reach of them. One look on the unfortunate might have given a day's happiness; one sigh over the pillow of sickness; one whisper might have given a night's repose; one whisper might have driven from their victim the furies of despair.—Walter Savage Lander.

—All the Year Round.

### To Divide Peace River Into Two Seats

After a preliminary skirmish with the vexed question of redistribution in the province, the special legislative committee named last session has dispersed for a few weeks with the following salient suggestions for a reshuffle more or less fixed on their minds, according to reports circulated in well informed government circles.

The vast constituency of Peace River will be cut in two, with a member each for Peace River and Grande Prairie.

The constituencies of Vegreville and Camrose may be revamped to provide for another seat between the two.

Industrial seats will be created at Drumheller and Turner Valley. The comparatively small group of constituencies consisting of Okotoks, High River, Nanton, Claresholm, Macleod and Pincher Creek probably

will be realigned with a reduction of two seats.

No change will be recommended in the cities of Calgary and Edmonton, each now having five members in the Legislature. Some months will elapse before the special committee completes its work, steps being taken at the present time to obtain information from the other provinces as to how the problem of redistribution has been met. In any event the clamor for a reduction in the number of legislative seats has been definitely left behind, and the recommendation of the special investigators at the next session of the assembly will call for an increase of two constituencies in the province, and possibly three.

### BIG SPRINGS

The Prairie Rock Club met at the home of Mrs. Ole Rudy on Thursday, June 20th. There was a large attendance, twenty-three ladies being present. A most enjoyable afternoon was spent by all. Mrs. Lloyd Anderson of Portland, Oregon, who is at present visiting her parents, Mr. and Mrs. Ole Rudy, assisted her mother to entertain. The next meeting will be held at the home of Mrs. Thos. Peterson on Thursday, July 11th.

Joseph Belmont, nephew of Fred Belmont, of Switzerland, arrived at Chinook at Chinook a short time ago, intends purchasing a farm in this district and making his home here.

During the past week Canada lost one of her foremost statesmen in the person of Hon. W. S. Field, at the ripe age of 76 years.

Service Second Sunday Every Month  
Mass at 8.00 a.m.

### Crop Management for Weed Control

A thorough summerfallow will usually be the most effective method of bringing the most persistent growing perennial weeds under control. When it is necessary to resort to the summerfallow as a weed control measure, it is advisable to adopt some systematic rotation of crops, with regular seeding down to grass and legumes at short intervals.

Many farmers feel that they can ill afford to free their land of weeds by any method which will not give a crop of some kind. While the eradication of perennial weeds such as sow thistle, quack grass, etc., necessitates the use of the fallow, such treatment does not free the land from many annual weeds such as wild oats, mustard, or stink weed, hence it is necessary from an economic standpoint to adopt farming methods that control rather than eradicate such weeds.

Land that is badly polluted with perennial weeds will produce an excellent crop of winter wheat or rye. Both of these crops act as smother crops for all types of weeds if they get a good start in the fall and do not winter kill.

Live stock, and particularly sheep, are valuable aids in weed control. Live stock are most essential to profitable agriculture on a weedy farm, as many of the crops which control weeds are not cash crops and can be marketed to best advantage by the live stock route. In addition to this, many perennial weeds with a creeping root system such as quack grass can be more easily eradicated if the land is seeded down and left in pasture for a few years until it becomes sod bound.

#### Notice of Sale

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that one dark brown pony, gelding, aged, two white hind feet, long white narrow strip on face, branded 127, was impounded in the pound kept by Mr. Albert Mayfield, located on the N.E. 1/4 Sec. 21, Twp. 32, Rge. 7, W. 4th Mer., on the 9th day of June, 1929, and that the animal was sold on the 22nd day of June, 1929, to J. Kopf of Chinook, Alberta, and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in the Alberta Gazette upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.
